organisation in accordance with ISPM4 as an area that is free from Thrips palmi.

The consignment complies with Annex 7 to Great Britain's Phytosanitary Regulation (2019/2072), part A item 8A a: originate in an area established by the national plant protection organisation of the country of origin in accordance with ISPM4 as an area that is free from *Popillia japonica*

The consignment complies with Annex 7 to Great Britain's Phytosanitary Regulation (2019/2072), part A item 8a + 8bi: No symptoms of the relevant pests (Begomo viruses, Cucumber vein yellowing virus, Cucurbit yellow stunting disorder virus, Lettuce infectious yellow virus, Melon yellowing-associated virus, Squash vein yellowing virus, Sweet potato chlorotic stunt virus, Sweet potato mild mottle virus, Tomato mild mottle virus, Tomato leaf curl New Delhi virus) have been observed on the plants during their complete cycle of vegetation, and the plants originate in areas which, in accordance with the measures specified in ISPM4, are known to be free from *Bemisia tabaci* and other vectors of the relevant pests.

The consignment complies with Annex 7 to Great Britain's Phytosanitary Regulation (2019/2072), part B item 2c: The plants have been produced in a site: (aa) that is authorised by the national plant protection organisation in accordance with ISPM10 as a site that is free from *Xylella fastidiosa* and its vectors, (bb) that is physically protected against the introduction of *Xylella fastidiosa* by its vectors, (cc) that is surrounded by a zone with a width of 100 m which has been subject to official inspections twice a year, and where all of the plants found to be infected with, or to have symptoms of, *Xylella fastidiosa* have been immediately removed, and appropriate phytosanitary treatments against the vectors of *Xylella fastidiosa* have been applied before that removal, (dd) that at appropriate times throughout the year, is subject to phytosanitary treatments to maintain freedom from the vectors of *Xylella fastidiosa*, including the removal of plants, (ee) that is subject annually, together with the zone referred to in point (cc), to at least two official inspections during the flight season of the vectors of *Xylella fastidiosa*, (ff) where throughout the production time of the plants, neither symptoms of *Xylella fastidiosa* nor its vectors were found in the site or, if suspect symptoms were observed, testing was carried out and the absence of *Xylella fastidiosa* confirmed, and (gg) where throughout the production time of the plants, no symptoms of *Xylella fastidiosa* were found in the zone referred to in point (cc) or, if suspect symptoms were observed, testing was carried out and the absence of *Xylella fastidiosa* confirmed, and (ii) that representative samples of each species of the plants from the site have been subject to annual testing, at the most appropriate time, and the absence of *Xylella fastidiosa* has been confirmed on the basis of tests carried out in accordance with internationally validated testing methods, and (iii) that the plants have been transported in closed containers or packaging, to prevent infection with *Xylella fastidiosa* or any of its known vectors, and (iv) that as close to the time of export as is practically possible, the lots of the plants were subject to official visual inspection, sampling and molecular testing, carried out in accordance with internationally validated testing methods, using a sampling scheme able to identify with 99% reliability the level of presence of infected plants of 1%, that targets in particular plants displaying symptoms of *Xylella fastidiosa*, and that confirmed the absence of *Xylella fastidiosa*, and (v) that immediately before export, the lots of the plants were subject to phytosanitary treatments against any known vectors of *Xylella fastidiosa*.

Callistemon citrinus (0010)

The consignment complies with Annex 7 to Great Britain's Phytosanitary Regulation (2019/2072), part A item 6ai: The plants originate in Spain as an area established by the national plant protection organisation in accordance with ISPM4 as an area that is free from Thrips palmi.

The consignment complies with Annex 7 to Great Britain's Phytosanitary Regulation (2019/2072), part A item 8A a: originate in an area established by the national plant protection organisation of the country of origin in accordance with ISPM4 as an area that is free from *Popillia japonica*

The consignment complies with Annex 7 to Great Britain's Phytosanitary Regulation (2019/2072), part A item 8a + 8bi: No symptoms of the relevant pests (Begomo viruses, Cucumber vein yellowing virus, Cucurbit yellow stunting disorder virus, Lettuce infectious yellow virus, Melon yellowing-associated virus, Squash vein yellowing virus, Sweet potato chlorotic stunt virus, Sweet potato mild mottle virus, Tomato mild mottle virus, Tomato leaf curl New Delhi virus) have been observed on the plants during their complete cycle of vegetation, and the plants originate in areas which, in accordance with the measures specified in ISPM4, are known to be free from *Bemisia tabaci* and other vectors of the relevant pests.

The consignment complies with Annex 7 to Great Britain's Phytosanitary Regulation (2019/2072), part B item 2c: The plants have been produced in a site: (aa) that is authorised by the national plant protection organisation in accordance with ISPM10 as a site that is free from *Xylella fastidiosa* and its vectors, (bb) that is physically protected against the introduction of *Xylella fastidiosa* by its vectors, (cc) that is surrounded by a zone with a width of 100 m which has been subject to official inspections twice a year, and where all of the plants found to be infected with, or to have symptoms of, *Xylella fastidiosa* have been immediately removed, and appropriate phytosanitary treatments against the vectors of *Xylella fastidiosa* have been applied before that removal, (dd) that at appropriate times throughout the year, is subject to phytosanitary treatments to maintain freedom from the vectors of *Xylella fastidiosa*, including the removal of plants, (ee) that is subject annually, together with the zone referred to in point (cc), to at least two official inspections during the flight season of the vectors of *Xylella fastidiosa*, (ff) where throughout the production time of the plants, neither symptoms of *Xylella fastidiosa* nor its vectors were found in the site or, if suspect symptoms were observed, testing was carried out and the absence of *Xylella fastidiosa* confirmed, and (gg) where throughout the production time of the plants, no symptoms of *Xylella fastidiosa* were found in the zone referred to in point (cc) or, if suspect symptoms were observed, testing was carried out and the absence of *Xylella fastidiosa* confirmed, and (ii) that representative samples of each species of the plants from the site have been subject to annual testing, at the most appropriate time, and the absence of *Xylella fastidiosa*

ANNEX

PHYTOSANITARY CERTIFICATE:

has been confirmed on the basis of tests carried out in accordance with internationally validated testing methods, and (iii) that the plants have been transported in closed containers or packaging, to prevent infection with *Xylella fastidiosa* or any of its known vectors, and (iv) that as close to the time of export as is practically possible, the lots of the plants were subject to official visual inspection, sampling and molecular testing, carried out in accordance with internationally validated testing methods, using a sampling scheme able to identify with 99% reliability the level of presence of infected plants of 1%, that targets in particular plants displaying symptoms of *Xylella fastidiosa*, and that confirmed the absence of *Xylella fastidiosa*, and (v) that immediately before export, the lots of the plants were subject to phytosanitary treatments against any known vectors of *Xylella fastidiosa*.

Campanula hybrid (0011); Clematis armandii (0021); Clematis hybrid (0019), (0020); Clematis montana (0022), (0023); Felicia amelloides (0043); Fuchsia hybrid (0048); Gazania hybrid (0049); Gerbera hybrid (0052); Jasminum polyanthum (0066), (0067); Osteospermum hybrid (0085); Passiflora caerulea (0088); Pericallis hybride (0090); Thunbergia alata (0127)

The consignment complies with Annex 7 to Great Britain's Phytosanitary Regulation (2019/2072), part A item 40e: Immediately prior to their export, the plants have been officially inspected and found free from *Liriomyza huidobrensis* and *Liriomyza trifolii*.

The consignment complies with Annex 7 to Great Britain's Phytosanitary Regulation (2019/2072), part A item 6ai: The plants originate in The Netherlands as an area established by the national plant protection organisation in accordance with ISPM4 as an area that is free from *Thrips palmi*.

The consignment complies with Annex 7 to Great Britain's Phytosanitary Regulation (2019/2072), part A item 8A a: the plants originate in the Netherlands established by the national plant protection organisation in accordance with ISPM4 as an area that is free from *Popillia japonica*

Dianthus caryophyllus (0031)

The consignment complies with Annex 7 to Great Britain's Phytosanitary Regulation (2019/2072), part A item 36a: The plants originate in the area The Netherlands, established by the national plant protection organisation in accordance with ISPM4 as an area that is free from *Spodoptera eridania*, *Spodoptera frugiperda* and *Spodoptera litura*.

The consignment complies with Annex 7 to Great Britain's Phytosanitary Regulation (2019/2072), part A item 38b: No signs of *Helicoverpa armigera* or *Spodoptera littoralis* have been observed at the place of production since the beginning of the last complete cycle of vegetation.

The consignment complies with Annex 7 to Great Britain's Phytosanitary Regulation (2019/2072), part A item 40e: Immediately prior to their export, the plants have been officially inspected and found free from *Liriomyza huidobrensis* and *Liriomyza trifolii*.

The consignment complies with Annex 7 to Great Britain's Phytosanitary Regulation (2019/2072), part A item 6ai: The plants originate in The Netherlands as an area established by the national plant protection organisation in accordance with ISPM4 as an area that is free from *Thrips palmi*.

The consignment complies with Annex 7 to Great Britain's Phytosanitary Regulation (2019/2072), part A item 8A a: the plants originate in the Netherlands established by the national plant protection organisation in accordance with ISPM4 as an area that is free from *Popillia japonica*

Dianthus hybrid (0030)

The consignment complies with Annex 7 to Great Britain's Phytosanitary Regulation (2019/2072), part A item 36a: The plants originate in the area The Netherlands, established by the national plant protection organisation in accordance with ISPM4 as an area that is free from *Spodoptera eridania*, *Spodoptera frugiperda* and *Spodoptera litura*.

The consignment complies with Annex 7 to Great Britain's Phytosanitary Regulation (2019/2072), part A item 38c: The plants have undergone appropriate treatment to protect them from those *Helicoverpa armigera* and *Spodoptera littoralis*.

The consignment complies with Annex 7 to Great Britain's Phytosanitary Regulation (2019/2072), part A item 40e: Immediately prior to their export, the plants have been officially inspected and found free from *Liriomyza huidobrensis* and *Liriomyza trifolii*.

The consignment complies with Annex 7 to Great Britain's Phytosanitary Regulation (2019/2072), part A item 6ai: The plants originate in The Netherlands as an area established by the national plant protection organisation in accordance with ISPM4 as an area that is free from *Thrips palmi*.

The consignment complies with Annex 7 to Great Britain's Phytosanitary Regulation (2019/2072), part A item 8A a: the plants originate in the Netherlands established by the national plant protection organisation in accordance with ISPM4 as an area that is free from *Popillia japonica*

Euonymus japonicus (0036); Photinia fraseri (0094)

The consignment complies with Annex 7 to Great Britain's Phytosanitary Regulation (2019/2072), part A item 6ai: The plants originate in Belgium as an area established by the national plant protection organisation in accordance with ISPM4 as an area that is free from *Thrips palmi*.

The consignment complies with Annex 7 to Great Britain's Phytosanitary Regulation (2019/2072), part A item 8A a: the plants originate in Belgium established by the national plant protection organisation in accordance with ISPM4 as an area that is free from *Popillia japonica*

Ficus carica (0045)

The consignment complies with Annex 7 to Great Britain's Phytosanitary Regulation (2019/2072), part A item 12d: The plants have been officially inspected and found free from *Bemisia tabaci* immediately prior to their movement.

The consignment complies with Annex 7 to Great Britain's Phytosanitary Regulation (2019/2072), part A item 6ai: The plants originate in The Netherlands as an area established by the national plant protection organisation in accordance with ISPM4 as an area that is free from *Thrips palmi*.

The consignment complies with Annex 7 to Great Britain's Phytosanitary Regulation (2019/2072), part A

PHYTOSANITARY CERTIFICATE:

item 8A a: the plants originate in the Netherlands established by the national plant protection organisation in accordance with ISPM4 as an area that is free from *Popillia japonica*
 The consignment complies with Annex 7 to Great Britain's Phytosanitary Regulation (2019/2072), part B item 2b: The plants have been grown during a period of at least three years before export, or in the case of plants which are younger than three years have been grown throughout their life, in the Netherlands established by the national plant protection organization in accordance with ISPM4 as an area that is free from *Xylella fastidiosa*.

Fragaria hybrid (0046)

The consignment complies with Annex 7 to Great Britain's Phytosanitary Regulation (2019/2072), part A item 28a: The plants originate in an area established by the national plant protection organisation in accordance with ISPM4 as an area that is free from *Candidatus Phytoplasma 'solani'*.
 The consignment complies with Annex 7 to Great Britain's Phytosanitary Regulation (2019/2072), part A item 6ai: The plants originate in The Netherlands as an area established by the national plant protection organisation in accordance with ISPM4 as an area that is free from *Thrips palmi*.
 The consignment complies with Annex 7 to Great Britain's Phytosanitary Regulation (2019/2072), part A item 84a: No symptoms of *Aphelenchoides besseyi* have been observed on plants at the place of production since the beginning of the last complete cycle of vegetation.
 The consignment complies with Annex 7 to Great Britain's Phytosanitary Regulation (2019/2072), part A item 8A a: the plants originate in the Netherlands established by the national plant protection organisation in accordance with ISPM4 as an area that is free from *Popillia japonica*

Hibiscus syriacus (0057)

The consignment complies with Annex 7 to Great Britain's Phytosanitary Regulation (2019/2072), part A item 12d: The plants have been officially inspected and found free from *Bemisia tabaci* immediately prior to their movement.
 The consignment complies with Annex 7 to Great Britain's Phytosanitary Regulation (2019/2072), part A item 40e: Immediately prior to their export, the plants have been officially inspected and found free from *Liriomyza huidobrensis* and *Liriomyza trifolii*.
 The consignment complies with Annex 7 to Great Britain's Phytosanitary Regulation (2019/2072), part A item 6ai: The plants originate in The Netherlands as an area established by the national plant protection organisation in accordance with ISPM4 as an area that is free from *Thrips palmi*.
 The consignment complies with Annex 7 to Great Britain's Phytosanitary Regulation (2019/2072), part A item 8A a: the plants originate in the Netherlands established by the national plant protection organisation in accordance with ISPM4 as an area that is free from *Popillia japonica*
 The consignment complies with Annex 7 to Great Britain's Phytosanitary Regulation (2019/2072), part B item 2b: The plants have been grown during a period of at least three years before export, or in the case of plants which are younger than three years have been grown throughout their life, in the Netherlands established by the national plant protection organization in accordance with ISPM4 as an area that is free from *Xylella fastidiosa*.

Laurus nobilis (0068)

The consignment complies with Annex 7 to Great Britain's Phytosanitary Regulation (2019/2072), part A item 6ai: The plants originate in Belgium as an area established by the national plant protection organisation in accordance with ISPM4 as an area that is free from *Thrips palmi*.
 The consignment complies with Annex 7 to Great Britain's Phytosanitary Regulation (2019/2072), part A item 8A a: the plants originate in Belgium established by the national plant protection organisation in accordance with ISPM4 as an area that is free from *Popillia japonica*
 The consignment complies with Annex 7 to Great Britain's Phytosanitary Regulation (2019/2072), part B item 2a: The plants have been grown during a period of at least three years before export, or in the case of plants which are younger than three years, have been grown throughout their life, in a country which, in accordance with the Measures specified in ISPM4, is known to be free from *Xylella fastidiosa*.

Lavandula angustifolia (0069); Lavandula stoechas (0072)

The consignment complies with Annex 7 to Great Britain's Phytosanitary Regulation (2019/2072), part A item 28a: The plants originate in an area established by the national plant protection organisation in accordance with ISPM4 as an area that is free from *Candidatus Phytoplasma 'solani'*.
 The consignment complies with Annex 7 to Great Britain's Phytosanitary Regulation (2019/2072), part A item 6ai: The plants originate in Italy as an area established by the national plant protection organisation in accordance with ISPM4 as an area that is free from *Thrips palmi*.
 The consignment complies with Annex 7 to Great Britain's Phytosanitary Regulation (2019/2072), part A item 8A a: originate in an area established by the national plant protection organisation of the country of origin in accordance with ISPM4 as an area that is free from *Popillia japonica*
 The consignment complies with Annex 7 to Great Britain's Phytosanitary Regulation (2019/2072), part A item 8a + 8bi: No symptoms of the relevant pests (*Begomo* viruses, Cucumber vein yellowing virus, Cucurbit yellow stunting disorder virus, Lettuce infectious yellow virus, Melon yellowing-associated virus, Squash vein yellowing virus, Sweet potato chlorotic stunt virus, Sweet potato mild mottle virus, Tomato mild mottle virus, Tomato leaf curl New Delhi virus) have been observed on the plants during their complete cycle of vegetation, and the plants originate in areas which, in accordance with the measures specified in ISPM4, are known to be free from *Bemisia tabaci* and other vectors of the relevant pests.
 The consignment complies with Annex 7 to Great Britain's Phytosanitary Regulation (2019/2072), part B item 4b: (i) The plants have been grown in a place of production which has been registered and supervised by the national plant protection organisation for a period of at least one year before the export of the plants, and (ii) the place of production, together with a 200m zone surrounding the place

PHYTOSANITARY CERTIFICATE:

No. EC NL/ PCNU 324348234

Date : 21-MARCH-2025

Page : 7 of 11

of production, is known to be free from *Xylella fastidiosa* on the basis of official inspections, which included testing where appropriate, that was carried out at appropriate times; and (iii) the plants have been subjected to an annual official inspection at an appropriate time, which included sampling and testing, that confirmed the absence of *Xylella fastidiosa* and was carried out in accordance with international standards using a sampling scheme able to identify with 99% reliability a level of presence of infected plants of 5%, and (iv) immediately before their export, the plants were subjected to an official visual inspection for the presence of *Xylella fastidiosa* and, where any symptoms giving rise to a suspicion of its presence were observed, were tested in line with international standards for its presence, confirming its absence, and (v) where there has been any evidence of the presence of the vector of *Xylella fastidiosa* at the place of production, chemical and cultural controls have been used to suppress the vector, and (vi) the plants have been grown throughout their life under complete physical protection, and appropriate hygiene measures have been implemented at the place of production to ensure that *Xylella fastidiosa* is not transmitted by tools or equipment.

Lavandula angustifolia (0070), (0071); Lavandula stoechas (0073), (0074)

The consignment complies with Annex 7 to Great Britain's Phytosanitary Regulation (2019/2072), part A item 28a: The plants originate in an area established by the national plant protection organisation in accordance with ISPM4 as an area that is free from *Candidatus Phytoplasma 'solani'*.

The consignment complies with Annex 7 to Great Britain's Phytosanitary Regulation (2019/2072), part A item 6ai: The plants originate in The Netherlands as an area established by the national plant protection organisation in accordance with ISPM4 as an area that is free from *Thrips palmi*.

The consignment complies with Annex 7 to Great Britain's Phytosanitary Regulation (2019/2072), part A item 8A a: the plants originate in the Netherlands established by the national plant protection organisation in accordance with ISPM4 as an area that is free from *Popillia japonica*.

The consignment complies with Annex 7 to Great Britain's Phytosanitary Regulation (2019/2072), part B item 4a: The plants have been grown: (i) during a period of at least three years before export, or in the case of plants which are younger than three years, have been grown throughout their life, in a country which, in accordance with the measures specified in ISPM4, is known to be free from *Xylella fastidiosa*, and (ii) in a site that is subject to annual official inspection, with sampling and testing carried out at the appropriate times on those plants for the presence of *Xylella fastidiosa* and in accordance with international standards, using a sampling scheme able to identify with 99% reliability a level of presence of infected plants of 5%, in which the absence of *Xylella fastidiosa* was confirmed.

Lithodora diffusa (0077); Mentha hybrid (0079); Origanum majorana (0083); Origanum vulgare (0084)

The consignment complies with Annex 7 to Great Britain's Phytosanitary Regulation (2019/2072), part A item 6ai: The plants originate in Italy as an area established by the national plant protection organisation in accordance with ISPM4 as an area that is free from *Thrips palmi*.

The consignment complies with Annex 7 to Great Britain's Phytosanitary Regulation (2019/2072), part A item 8A a: originate in an area established by the national plant protection organisation of the country of origin in accordance with ISPM4 as an area that is free from *Popillia japonica*.

The consignment complies with Annex 7 to Great Britain's Phytosanitary Regulation (2019/2072), part A item 8a + 8bi: No symptoms of the relevant pests (Begomo viruses, Cucumber vein yellowing virus, Cucurbit yellow stunting disorder virus, Lettuce infectious yellow virus, Melon yellowing-associated virus, Squash vein yellowing virus, Sweet potato chlorotic stunt virus, Sweet potato mild mottle virus, Tomato mild mottle virus, Tomato leaf curl New Delhi virus) have been observed on the plants during their complete cycle of vegetation, and the plants originate in areas which, in accordance with the measures specified in ISPM4, are known to be free from *Bemisia tabaci* and other vectors of the relevant pests.

Musa basjoo (0082)

The consignment complies with Annex 7 to Great Britain's Phytosanitary Regulation (2019/2072), part A item 30b: No symptoms of *Ralstonia solanacearum*, *Ralstonia pseudosolanacearum*, *Ralstonia syzygii* subsp. *celebensis* and *Ralstonia syzygii* subsp. *indonesiensis*. have been observed on the plants at the place of production since the beginning of the last complete cycle of vegetation.

The consignment complies with Annex 7 to Great Britain's Phytosanitary Regulation (2019/2072), part A item 6ai: The plants originate in The Netherlands as an area established by the national plant protection organisation in accordance with ISPM4 as an area that is free from *Thrips palmi*.

The consignment complies with Annex 7 to Great Britain's Phytosanitary Regulation (2019/2072), part A item 8A a: the plants originate in the Netherlands established by the national plant protection organisation in accordance with ISPM4 as an area that is free from *Popillia japonica*.

Pelargonium grandiflorum (0089)

The consignment complies with Annex 7 to Great Britain's Phytosanitary Regulation (2019/2072), part A item 36a: The plants originate in the area The Netherlands, established by the national plant protection organisation in accordance with ISPM4 as an area that is free from *Spodoptera eridania*, *Spodoptera frugiperda* and *Spodoptera litura*.

The consignment complies with Annex 7 to Great Britain's Phytosanitary Regulation (2019/2072), part A item 38b: No signs of *Helicoverpa armigera* or *Spodoptera littoralis* have been observed at the place of production since the beginning of the last complete cycle of vegetation.

The consignment complies with Annex 7 to Great Britain's Phytosanitary Regulation (2019/2072), part A item 40e: Immediately prior to their export, the plants have been officially inspected and found free from *Liriomyza huidobrensis* and *Liriomyza trifolii*.

The consignment complies with Annex 7 to Great Britain's Phytosanitary Regulation (2019/2072), part A item 6ai: The plants originate in The Netherlands as an area established by the national plant

PHYTOSANITARY CERTIFICATE:

No. EC NL/ PCNU 324348234

Date : 21-MARCH-2025

protection organisation in accordance with ISPM4 as an area that is free from Thrips palmi.
 The consignment complies with Annex 7 to Great Britain's Phytosanitary Regulation (2019/2072), part A item 8A a: the plants originate in the Netherlands established by the national plant protection organisation in accordance with ISPM4 as an area that is free from Popillia japonica
 The consignment complies with Annex 7 to Great Britain's Phytosanitary Regulation (2019/2072), part B item 2b: The plants have been grown during a period of at least three years before export, or in the case of plants which are younger than three years have been grown throughout their life, in the Netherlands established by the national plant protection organization in accordance with ISPM4 as an area that is free from Xylella fastidiosa.

Petunia hybrid (0091)

The consignment complies with Annex 7 to Great Britain's Phytosanitary Regulation (2019/2072), part A item 28a: The plants originate in an area established by the national plant protection organisation in accordance with ISPM4 as an area that is free from Candidatus Phytoplasma 'solani'.
 The consignment complies with Annex 7 to Great Britain's Phytosanitary Regulation (2019/2072), part A item 40e: Immediately prior to their export, the plants have been officially inspected and found free from Liriomyza huidobrensis and Liriomyza trifolii.
 The consignment complies with Annex 7 to Great Britain's Phytosanitary Regulation (2019/2072), part A item 6ai: The plants originate in The Netherlands as an area established by the national plant protection organisation in accordance with ISPM4 as an area that is free from Thrips palmi.
 The consignment complies with Annex 7 to Great Britain's Phytosanitary Regulation (2019/2072), part A item 8A a: the plants originate in the Netherlands established by the national plant protection organisation in accordance with ISPM4 as an area that is free from Popillia japonica
 The consignment complies with Annex 7 to Great Britain's Phytosanitary Regulation (2019/2072), part A item 9ai + 9bii: The plants originate in areas which, in accordance with the measures specified in ISPM4, are known to be free from Tomato leaf curl New Delhi Virus, and The plants have been subjected to an effective treatment ensuring the eradication of Bemisia tabaci and other vectors of Tomato leaf curl New Delhi Virus.

Phormium hybrid (0092); Trachelospermum jasminoides (0129); Yucca filamentosa (0138)

The consignment complies with Annex 7 to Great Britain's Phytosanitary Regulation (2019/2072), part A item 6ai: The plants originate in Spain as an area established by the national plant protection organisation in accordance with ISPM4 as an area that is free from Thrips palmi.
 The consignment complies with Annex 7 to Great Britain's Phytosanitary Regulation (2019/2072), part A item 8A a: originate in an area established by the national plant protection organisation of the country of origin in accordance with ISPM4 as an area that is free from Popillia japonica
 The consignment complies with Annex 7 to Great Britain's Phytosanitary Regulation (2019/2072), part A item 8a + 8bi: No symptoms of the relevant pests (Begomo viruses, Cucumber vein yellowing virus, Cucurbit yellow stunting disorder virus, Lettuce infectious yellow virus, Melon yellowing-associated virus, Squash vein yellowing virus, Sweet potato chlorotic stunt virus, Sweet potato mild mottle virus, Tomato mild mottle virus, Tomato leaf curl New Delhi virus) have been observed on the plants during their complete cycle of vegetation, and the plants originate in areas which, in accordance with the measures specified in ISPM4, are known to be free from Bemisia tabaci and other vectors of the relevant pests.

Prunus laurocerasus (0100), (0101)

The consignment complies with Annex 7 to Great Britain's Phytosanitary Regulation (2019/2072), part A item 6ai: The plants originate in Belgium as an area established by the national plant protection organisation in accordance with ISPM4 as an area that is free from Thrips palmi.
 The consignment complies with Annex 7 to Great Britain's Phytosanitary Regulation (2019/2072), part A item 76za: The plants originate in Belgium as an area which, in accordance with the measures specified in ISPM4, is known to be free from Candidatus Phytoplasma 'pruni' (16SrIII-A).
 The consignment complies with Annex 7 to Great Britain's Phytosanitary Regulation (2019/2072), part A item 77a: The plants originate in areas known to be free from Candidatus Phytoplasma 'prunorum'.
 The consignment complies with Annex 7 to Great Britain's Phytosanitary Regulation (2019/2072), part A item 79d: No symptoms of Xanthomonas arboricola pv. pruni have been observed on plants at the place of production since the beginning of the last complete growing season.
 The consignment complies with Annex 7 to Great Britain's Phytosanitary Regulation (2019/2072), part A item 8A a: the plants originate in Belgium established by the national plant protection organisation in accordance with ISPM4 as an area that is free from Popillia japonica
 The consignment complies with Annex 7 to Great Britain's Phytosanitary Regulation (2019/2072), part B item 2a: The plants have been grown during a period of at least three years before export, or in the case of plants which are younger than three years, have been grown throughout their life, in a country which, in accordance with the Measures specified in ISPM4, is known to be free from Xylella fastidiosa.

Prunus lusitanica (0102)

The consignment complies with Annex 7 to Great Britain's Phytosanitary Regulation (2019/2072), part A item 6ai: The plants originate in The Netherlands as an area established by the national plant protection organisation in accordance with ISPM4 as an area that is free from Thrips palmi.
 The consignment complies with Annex 7 to Great Britain's Phytosanitary Regulation (2019/2072), part A item 76za: The plants originate in The Netherlands as an area which, in accordance with the measures specified in ISPM4, is known to be free from Candidatus Phytoplasma 'pruni' (16SrIII-A).
 The consignment complies with Annex 7 to Great Britain's Phytosanitary Regulation (2019/2072), part A item 77a: The plants originate in areas known to be free from Candidatus Phytoplasma 'prunorum'.
 The consignment complies with Annex 7 to Great Britain's Phytosanitary Regulation (2019/2072), part A

item 79d: No symptoms of *Xanthomonas arboricola* pv. *pruni* have been observed on plants at the place of production since the beginning of the last complete growing season.

The consignment complies with Annex 7 to Great Britain's Phytosanitary Regulation (2019/2072), part A item 8A a: the plants originate in the Netherlands established by the national plant protection organisation in accordance with ISPM4 as an area that is free from *Popillia japonica*

The consignment complies with Annex 7 to Great Britain's Phytosanitary Regulation (2019/2072), part B item 2b: The plants have been grown during a period of at least three years before export, or in the case of plants which are younger than three years have been grown throughout their life, in the Netherlands established by the national plant protection organization in accordance with ISPM4 as an area that is free from *Xylella fastidiosa*.

Rhododendron hybrid (0104); Rhododendron japonicum (0105), (0106)

The consignment complies with Annex 7 to Great Britain's Phytosanitary Regulation (2019/2072), part A item 6ai: The plants originate in The Netherlands as an area established by the national plant protection organisation in accordance with ISPM4 as an area that is free from *Thrips palmi*.

The consignment complies with Annex 7 to Great Britain's Phytosanitary Regulation (2019/2072), part A item 8A a: the plants originate in the Netherlands established by the national plant protection organisation in accordance with ISPM4 as an area that is free from *Popillia japonica*

The consignment complies with Annex 7 to Great Britain's Phytosanitary Regulation (2019/2072), part B item 1c: Where signs of *Phytophthora ramorum*, have been found on the plants at the place of production, an official statement that appropriate procedures have been implemented for the purpose of eradicating that pest and the plants have been found free from the pest following those procedures, which consisted of at least: (i) destruction of the infected plants and all susceptible plants within a 2 m radius of the infected plants, including associated growing media and plant debris, (ii) in the case of plants (*Viburnum* spp., *Camellia* spp. of *Rhododendron* spp., other than *Rhododendron simsii*) of this entry within a 10 m radius of the infected plants and any remaining plants from the infected lot: (aa)they have been retained at the place of production, (bb)additional official inspections have been carried out at least twice in the three months after the eradication measures have been taken when the plants are in active growth, (cc)no treatments that may suppress symptoms of the plant pest have been carried out in that three month period, and (dd)the plants have been found free from the pest on these official inspections, (iii) in the case of all other plants (*Viburnum* spp., *Camellia* spp. of *Rhododendron* spp., m.u.v. *Rhododendron simsii*) of this entry at the place of production, the plants have been subjected to intensive official re-inspection and have been found free from the pest on those inspections, and (iv) appropriate phytosanitary measures have been taken on the growing surface within a 2 m radius of infected plants.

Salvia nemorosa (0119); Scabiosa columbaria (0121)

The consignment complies with Annex 7 to Great Britain's Phytosanitary Regulation (2019/2072), part A item 40e: Immediately prior to their export, the plants have been officially inspected and found free from *Liriomyza huidobrensis* and *Liriomyza trifolii*.

The consignment complies with Annex 7 to Great Britain's Phytosanitary Regulation (2019/2072), part A item 6ai: The plants originate in The Netherlands as an area established by the national plant protection organisation in accordance with ISPM4 as an area that is free from *Thrips palmi*.

The consignment complies with Annex 7 to Great Britain's Phytosanitary Regulation (2019/2072), part A item 8A a: the plants originate in the Netherlands established by the national plant protection organisation in accordance with ISPM4 as an area that is free from *Popillia japonica*

The consignment complies with Annex 7 to Great Britain's Phytosanitary Regulation (2019/2072), part B item 2b: The plants have been grown during a period of at least three years before export, or in the case of plants which are younger than three years have been grown throughout their life, in the Netherlands established by the national plant protection organization in accordance with ISPM4 as an area that is free from *Xylella fastidiosa*.

Salvia rosmarinus (0110)

The consignment complies with Annex 7 to Great Britain's Phytosanitary Regulation (2019/2072), part A item 40e: Immediately prior to their export, the plants have been officially inspected and found free from *Liriomyza huidobrensis* and *Liriomyza trifolii*.

The consignment complies with Annex 7 to Great Britain's Phytosanitary Regulation (2019/2072), part A item 6ai: The plants originate in Italy as an area established by the national plant protection organisation in accordance with ISPM4 as an area that is free from *Thrips palmi*.

The consignment complies with Annex 7 to Great Britain's Phytosanitary Regulation (2019/2072), part A item 8A a: originate in an area established by the national plant protection organisation of the country of origin in accordance with ISPM4 as an area that is free from *Popillia japonica*

The consignment complies with Annex 7 to Great Britain's Phytosanitary Regulation (2019/2072), part A item 8a + 8bi: No symptoms of the relevant pests (*Begomo* viruses, Cucumber vein yellowing virus, Cucurbit yellow stunting disorder virus, Lettuce infectious yellow virus, Melon yellowing-associated virus, Squash vein yellowing virus, Sweet potato chlorotic stunt virus, Sweet potato mild mottle virus, Tomato mild mottle virus, Tomato leaf curl New Delhi virus) have been observed on the plants during their complete cycle of vegetation, and the plants originate in areas which, in accordance with the measures specified in ISPM4, are known to be free from *Bemisia tabaci* and other vectors of the relevant pests.

The consignment complies with Annex 7 to Great Britain's Phytosanitary Regulation (2019/2072), part B item 4b: (i) The plants have been grown in a place of production which has been registered and supervised by the national plant protection organisation for a period of at least one year before the export of the plants, and (ii) the place of production, together with a 200m zone surrounding the place of production, is known to be free from *Xylella fastidiosa* on the basis of official inspections, which

included testing where appropriate, that was carried out at appropriate times; and (iii) the plants have been subjected to an annual official inspection at an appropriate time, which included sampling and testing, that confirmed the absence of *Xylella fastidiosa* and was carried out in accordance with international standards using a sampling scheme able to identify with 99% reliability a level of presence of infected plants of 5%, and (iv) immediately before their export, the plants were subjected to an official visual inspection for the presence of *Xylella fastidiosa* and, where any symptoms giving rise to a suspicion of its presence were observed, were tested in line with international standards for its presence, confirming its absence, and (v) where there has been any evidence of the presence of the vector of *Xylella fastidiosa* at the place of production, chemical and cultural controls have been used to suppress the vector, and (vi) the plants have been grown throughout their life under complete physical protection, and appropriate hygiene measures have been implemented at the place of production to ensure that *Xylella fastidiosa* is not transmitted by tools or equipment.

Thymus hybrid (0128)

The consignment complies with Annex 7 to Great Britain's Phytosanitary Regulation (2019/2072), part A item 6ai: The plants originate in Italy as an area established by the national plant protection organisation in accordance with ISPM4 as an area that is free from *Thrips palmi*.

The consignment complies with Annex 7 to Great Britain's Phytosanitary Regulation (2019/2072), part A item 8A a: originate in an area established by the national plant protection organisation of the country of origin in accordance with ISPM4 as an area that is free from *Popillia japonica*

The consignment complies with Annex 7 to Great Britain's Phytosanitary Regulation (2019/2072), part A item 8a + 8biii: No symptoms of the relevant pests (*Begomo* viruses, Cucumber vein yellowing virus, Cucurbit yellow stunting disorder virus, Lettuce infectious yellow virus, Melon yellowing-associated virus, Squash vein yellowing virus, Sweet potato chlorotic stunt virus, Sweet potato mild mottle virus, Tomato mild mottle virus, Tomato leaf curl New Delhi virus) have been observed on the plants during their complete cycle of vegetation, and the plants have been subjected to an effective treatment ensuring the eradication of *Bemisia tabaci* and the other vectors of the relevant pests and have been found free from those pests prior to export.

Vaccinium corymbosum (0132), (0133)

The consignment complies with Annex 7 to Great Britain's Phytosanitary Regulation (2019/2072), part A item 28a: The plants originate in an area established by the national plant protection organisation in accordance with ISPM4 as an area that is free from *Candidatus Phytoplasma 'solani'*.

The consignment complies with Annex 7 to Great Britain's Phytosanitary Regulation (2019/2072), part A item 6ai: The plants originate in The Netherlands as an area established by the national plant protection organisation in accordance with ISPM4 as an area that is free from *Thrips palmi*.

The consignment complies with Annex 7 to Great Britain's Phytosanitary Regulation (2019/2072), part A item 85a: The plants originate in an area, which in accordance with the measures specified in ISPM4, is known to be free from *Diaporthe vaccinii*.

The consignment complies with Annex 7 to Great Britain's Phytosanitary Regulation (2019/2072), part A item 8A a: the plants originate in the Netherlands established by the national plant protection organisation in accordance with ISPM4 as an area that is free from *Popillia japonica*

The consignment complies with Annex 7 to Great Britain's Phytosanitary Regulation (2019/2072), part B item 2b: The plants have been grown during a period of at least three years before export, or in the case of plants which are younger than three years have been grown throughout their life, in the Netherlands established by the national plant protection organization in accordance with ISPM4 as an area that is free from *Xylella fastidiosa*.

Vitis hybrid (0135); Vitis vinifera (0136)

The consignment complies with Annex 7 to Great Britain's Phytosanitary Regulation (2019/2072), part A item 28a: The plants originate in an area established by the national plant protection organisation in accordance with ISPM4 as an area that is free from *Candidatus Phytoplasma 'solani'*.

The consignment complies with Annex 7 to Great Britain's Phytosanitary Regulation (2019/2072), part A item 6ai: The plants originate in The Netherlands as an area established by the national plant protection organisation in accordance with ISPM4 as an area that is free from *Thrips palmi*.

The consignment complies with Annex 7 to Great Britain's Phytosanitary Regulation (2019/2072), part A item 87a: The plants originate in an area, which in accordance with the measures specified in ISPM4, is known to be free from Grapevine flavesence dorée phytoplasma.

The consignment complies with Annex 7 to Great Britain's Phytosanitary Regulation (2019/2072), part A item 8A a: the plants originate in the Netherlands established by the national plant protection organisation in accordance with ISPM4 as an area that is free from *Popillia japonica*

The consignment complies with Annex 7 to Great Britain's Phytosanitary Regulation (2019/2072), part B item 2b: The plants have been grown during a period of at least three years before export, or in the case of plants which are younger than three years have been grown throughout their life, in the Netherlands established by the national plant protection organization in accordance with ISPM4 as an area that is free from *Xylella fastidiosa*.
