11 Additional declaration

Alstroemeria sp. (0001); Astrantia sp. (0002); Eupatorium sp. (0014)

The consignment complies with Annex 7 to Great Britain's Phytosanitary Regulation (2019/2072), part A item 40e: Immediately prior to their export, the plants have been officially inspected and found free from Liriomyza huidobrensis and Liriomyza trifolii.

The consignment complies with Annex 7 to Great Britain's Phytosanitary Regulation (2019/2072), part A item 6ai: The plants originate in The Netherlands as an area established by the national plant protection organisation in accordance with ISPM4 as an area that is free from Thrips palmi.

Berberis sp. (0003); Carex sp. (0004); Carpinus sp. (0005); Catalpa sp. (0006); Choisya sp. (0008); Coreopsis sp. (0009); Cortaderia selloana (0010); Euonymus sp. (0013); Fagus sylvatica (0015); Helleborus sp. (0017); Heuchera sp. (0018); Hydrangea sp. (0019); Hypericum sp. (0020); Pulmonaria sp. (0024); Rodgersia sp. (0025); Sarcococca sp. (0026); Skimmia sp. (0028); Veronicastrum sp. (0029); Weigela sp. (0030)

The consignment complies with Annex 7 to Great Britain's Phytosanitary Regulation (2019/2072), part A item 6ai: The plants originate in The Netherlands as an area established by the national plant protection organisation in accordance with ISPM4 as an area that is free from Thrips palmi.

Cercis siliquastrum (0007); Cytisus sp. (0011); Hebe sp. (0016)

The consignment complies with Annex 7 to Great Britain's Phytosanitary Regulation (2019/2072), part A item 6ai: The plants originate in The Netherlands as an area established by the national plant protection organisation in accordance with ISPM4 as an area that is free from Thrips palmi.

The consignment complies with Annex 7 to Great Britain's Phytosanitary Regulation (2019/2072), part B item 2b: The plants have been grown during a period of at least three years before export, or in the case of plants which are younger than three years have been grown throughout their life, in the Netherlands established by the national plant protection organization in accordance with ISPM4 as an area that is free from Xylella fastidiosa.

Erigeron sp. (0012)

The consignment complies with Annex 7 to Great Britain's Phytosanitary Regulation (2019/2072), part A item 40e: Immediately prior to their export, the plants have been officially inspected and found free from Liriomyza huidobrensis and Liriomyza trifolii.

The consignment complies with Annex 7 to Great Britain's Phytosanitary Regulation (2019/2072), part A item 6ai: The plants originate in The Netherlands as an area established by the national plant protection organisation in accordance with ISPM4 as an area that is free from Thrips palmi.

The consignment complies with Annex 7 to Great Britain's Phytosanitary Regulation (2019/2072), part B item 2b: The plants have been grown during a period of at least three years before export, or in the case of plants which are younger than three years have been grown throughout their life, in the Netherlands established by the national plant protection organization in accordance with ISPM4 as an area that is free from Xylella fastidiosa.

Osmanthus heterophyllus (0021); Sedum sp. (0027)

The consignment complies with Annex 7 to Great Britain's Phytosanitary Regulation (2019/2072), part A item 6ai: The plants originate in Belgium as an area established by the national plant protection organisation in accordance with ISPM4 as an area that is free from Thrips palmi.

Prunus laurocerasus (0022)

The consignment complies with Annex 7 to Great Britain's Phytosanitary Regulation (2019/2072), part A item 6ai: The plants originate in The Netherlands as an area established by the national plant protection organisation in accordance with ISPM4 as an area that is free from Thrips palmi.

The consignment complies with Annex 7 to Great Britain's Phytosanitary Regulation (2019/2072), part A item 76b: No symptoms of diseases caused by Candidatus Phytoplasma 'pruni' (16SrIII-A) have been observed on the plants at the place of production, or on susceptible plants in its immediate vicinity, since the beginning of the last three complete cycles of vegetation.

The consignment complies with Annex 7 to Great Britain's Phytosanitary Regulation (2019/2072), part A

item 77b: No symptoms of diseases caused by Candidatus Phytoplasma 'prunorum' have been observed on plants at the place of production since the beginning of the last complete cycle of vegetation.
The consignment complies with Annex 7 to Great Britain's Phytosanitary Regulation (2019/2072), part A item 79d: No symptoms of Xanthomonas arboricola pv. pruni have been observed on plants at the place of production since the beginning of the last complete growing season.

The consignment complies with Annex 7 to Great Britain's Phytosanitary Regulation (2019/2072), part B item 2b: The plants have been grown during a period of at least three years before export, or in the case of plants which are younger than three years have been grown throughout their life, in the Netherlands established by the national plant protection organization in accordance with ISPM4 as an area that is free from Xylella fastidiosa.

Prunus serrula (0023)

The consignment complies with Annex 7 to Great Britain's Phytosanitary Regulation (2019/2072), part A item 6ai: The plants originate in The Netherlands as an area established by the national plant protection organisation in accordance with ISPM4 as an area that is free from Thrips palmi.

The consignment complies with Annex 7 to Great Britain's Phytosanitary Regulation (2019/2072), part A item 76b: No symptoms of diseases caused by Candidatus Phytoplasma 'pruni' (16SrIII-A) have been observed on the plants at the place of production, or on susceptible plants in its immediate vicinity, since the beginning of the last three complete cycles of vegetation.

The consignment complies with Annex 7 to Great Britain's Phytosanitary Regulation (2019/2072), part A item 77b: No symptoms of diseases caused by Candidatus Phytoplasma 'prunorum' have been observed on plants at the place of production since the beginning of the last complete cycle of vegetation.

The consignment complies with Annex 7 to Great Britain's Phytosanitary Regulation (2019/2072), part A item 79c: The plants have been derived in direct line from mother plants which have shown no symptoms of Xanthomonas arboricola pv. pruni during the last complete cycle of vegetation and no symptoms of that pest have been observed on the plants at the place of production since the beginning of the last complete cycle of vegetation.

The consignment complies with Annex 7 to Great Britain's Phytosanitary Regulation (2019/2072), part B item 2b: The plants have been grown during a period of at least three years before export, or in the case of plants which are younger than three years have been grown throughout their life, in the Netherlands established by the national plant protection organization in accordance with ISPM4 as an area that is free from Xylella fastidiosa.
