0015	Sempervivum sp. (NETHERLANDS)	1	Piece 50 Pieces
0016	Zantedeschia hybrid (NETHERLANDS)	1	Piece 24 Pieces

11 Additional declaration

Buxus sempervirens (0001); Cordyline australis (0002); Sempervivum sp. (0015); Zantedeschia hybrid (0016)

The consignment complies with Annex 7 to Great Britain's Phytosanitary Regulation (2019/2072), part A item 6ai: The plants originate in The Netherlands as an area established by the national plant protection organisation in accordance with ISPM4 as an area that is free from Thrips palmi.

The consignment complies with Annex 7 to Great Britain's Phytosanitary Regulation (2019/2072), part A item 8A a: the plants originate in the Netherlands established by the national plant protection organisation in accordance with ISPM4 as an area that is free from Popillia japonica

Geranium hybrid (0003); Hosta hybrid (0005)

The consignment complies with Annex 7 to Great Britain's Phytosanitary Regulation (2019/2072), part A item 6ai: The plants originate in Belgium as an area established by the national plant protection organisation in accordance with ISPM4 as an area that is free from Thrips palmi.

The consignment complies with Annex 7 to Great Britain's Phytosanitary Regulation (2019/2072), part A item 8A a: the plants originate in Belgium established by the national plant protection organisation in accordance with ISPM4 as an area that is free from Popillia japonica

Hebe hybrid (0004)

The consignment complies with Annex 7 to Great Britain's Phytosanitary Regulation (2019/2072), part A item 6ai: The plants originate in The Netherlands as an area established by the national plant protection organisation in accordance with ISPM4 as an area that is free from Thrips palmi.

The consignment complies with Annex 7 to Great Britain's Phytosanitary Regulation (2019/2072), part A item 8A a: the plants originate in the Netherlands established by the national plant protection organisation in accordance with ISPM4 as an area that is free from Popillia japonica

The consignment complies with Annex 7 to Great Britain's Phytosanitary Regulation (2019/2072), part B item 2b: The plants have been grown during a period of at least three years before export, or in the case of plants which are younger than three years have been grown throughout their life, in the Netherlands established by the national plant protection organization in accordance with ISPM4 as an area that is free from Xylella fastidiosa.

Jasminum polyanthum (0006); Oxalis hybrid (0010); Papaver nudicaule (0011)

The consignment complies with Annex 7 to Great Britain's Phytosanitary Regulation (2019/2072), part A item 40e: Immediately prior to their export, the plants have been officially inspected and found free from Liriomyza huidobrensis and Liriomyza trifolii.

The consignment complies with Annex 7 to Great Britain's Phytosanitary Regulation (2019/2072), part A item 6ai: The plants originate in The Netherlands as an area established by the national plant protection organisation in accordance with ISPM4 as an area that is free from Thrips palmi.

The consignment complies with Annex 7 to Great Britain's Phytosanitary Regulation (2019/2072), part A item 8A a: the plants originate in the Netherlands established by the national plant protection organisation in accordance with ISPM4 as an area that is free from Popillia japonica

Lavandula angustifolia (0007), (0008); Lavandula stoechas (0009)

The consignment complies with Annex 7 to Great Britain's Phytosanitary Regulation (2019/2072), part A item 28a: The plants originate in an area established by the national plant protection organisation in accordance with ISPM4 as an area that is free from Candidatus Phytoplasma 'solani'.

The consignment complies with Annex 7 to Great Britain's Phytosanitary Regulation (2019/2072), part A item 6ai: The plants originate in The Netherlands as an area established by the national plant protection organisation in accordance with ISPM4 as an area that is free from Thrips palmi.

The consignment complies with Annex 7 to Great Britain's Phytosanitary Regulation (2019/2072), part A item 8A a: the plants originate in the Netherlands established by the national plant protection organisation in accordance with ISPM4 as an area that is free from Popillia japonica

The consignment complies with Annex 7 to Great Britain's Phytosanitary Regulation (2019/2072), part B item 4a: The plants have been grown: (i) during a period of at least three years before export, or in the case of plants which are younger than three years, have been grown throughout their life, in a country which, in accordance with the measures specified in ISPM4, is known to be free from Xylella fastidiosa, and (ii) in a site that is subject to annual official inspection, with sampling and testing carried out at the appropriate times on those plants for the presence of Xylella fastidiosa and in accordance with international standards, using a sampling scheme able to identify with 99% reliability a level of presence of infected plants of 5%, in which the absence of Xylella fastidiosa was confirmed.

Rhododendron hybrid (0012); Rhododendron japonicum (0014)

The consignment complies with Annex 7 to Great Britain's Phytosanitary Regulation (2019/2072), part A item 6ai: The plants originate in Belgium as an area established by the national plant protection organisation in accordance with ISPM4 as an area that is free from Thrips palmi.

The consignment complies with Annex 7 to Great Britain's Phytosanitary Regulation (2019/2072), part A item 8A a: the plants originate in Belgium established by the national plant protection organisation in accordance with ISPM4 as an area that is free from Popillia japonica

The consignment complies with Annex 7 to Great Britain's Phytosanitary Regulation (2019/2072), part B

ANNEX

PHYTOSANITARY CERTIFICATE:

No. EC NL/ PCNU 326483575

Date : 15-APRIL-2025

Page : 2 of 2

item 1c: Where signs of *Phytophthora ramorum*, have been found on the plants at the place of production, an official statement that appropriate procedures have been implemented for the purpose of eradicating that pest and the plants have been found free from the pest following those procedures, which consisted of at least: (i) destruction of the infected plants and all susceptible plants within a 2 m radius of the infected plants, including associated growing media and plant debris, (ii) in the case of plants (*Viburnum* spp., *Camellia* spp. of *Rhododendron* spp., other than *Rhododendron simsii*) of this entry within a 10 m radius of the infected plants and any remaining plants from the infected lot: (aa) they have been retained at the place of production, (bb) additional official inspections have been carried out at least twice in the three months after the eradication measures have been taken when the plants are in active growth, (cc) no treatments that may suppress symptoms of the plant pest have been carried out in that three month period, and (dd) the plants have been found free from the pest on these official inspections, (iii) in the case of all other plants (*Viburnum* spp., *Camellia* spp. of *Rhododendron* spp., m.u.v. *Rhododendron simsii*) of this entry at the place of production, the plants have been subjected to intensive official re-inspection and have been found free from the pest on those inspections, and (iv) appropriate phytosanitary measures have been taken on the growing surface within a 2 m radius of infected plants.

Rhododendron hybrid (0013)

The consignment complies with Annex 7 to Great Britain's Phytosanitary Regulation (2019/2072), part A item 6ai: The plants originate in The Netherlands as an area established by the national plant protection organisation in accordance with ISPM4 as an area that is free from *Thrips palmi*.

The consignment complies with Annex 7 to Great Britain's Phytosanitary Regulation (2019/2072), part A item 8A a: the plants originate in the Netherlands established by the national plant protection organisation in accordance with ISPM4 as an area that is free from *Popillia japonica*

The consignment complies with Annex 7 to Great Britain's Phytosanitary Regulation (2019/2072), part B item 1c: Where signs of *Phytophthora ramorum*, have been found on the plants at the place of production, an official statement that appropriate procedures have been implemented for the purpose of eradicating that pest and the plants have been found free from the pest following those procedures, which consisted of at least: (i) destruction of the infected plants and all susceptible plants within a 2 m radius of the infected plants, including associated growing media and plant debris, (ii) in the case of plants (*Viburnum* spp., *Camellia* spp. of *Rhododendron* spp., other than *Rhododendron simsii*) of this entry within a 10 m radius of the infected plants and any remaining plants from the infected lot: (aa) they have been retained at the place of production, (bb) additional official inspections have been carried out at least twice in the three months after the eradication measures have been taken when the plants are in active growth, (cc) no treatments that may suppress symptoms of the plant pest have been carried out in that three month period, and (dd) the plants have been found free from the pest on these official inspections, (iii) in the case of all other plants (*Viburnum* spp., *Camellia* spp. of *Rhododendron* spp., m.u.v. *Rhododendron simsii*) of this entry at the place of production, the plants have been subjected to intensive official re-inspection and have been found free from the pest on those inspections, and (iv) appropriate phytosanitary measures have been taken on the growing surface within a 2 m radius of infected plants.
