11 Additional declaration

Aglaonema sp. (0001); Aloe vera (0002); Calathea sp. (0004); Callisia sp. (0005); Chlorophytum sp. (0007); Crassula sp. (0009); Dypsis lutescens (0012), (0013); Echeveria sp. (0014); Epipremnum sp. (0016); Gasteria sp. (0017); Haworthia sp. (0018); Howea forsteriana (0020); Hydrangea sp. (0021); Pilea sp. (0025); Polyscias sp. (0026); Sedum sp. (0027); Spathiphyllum sp. (0029), (0031); Strelitzia nicolai (0033); Yucca sp. (0034); Zantedeschia sp. (0035)

The consignment complies with Annex 7 to Great Britain's Phytosanitary Regulation (2019/2072), part A item 6ai: The plants originate in The Netherlands as an area established by the national plant protection organisation in accordance with ISPM4 as an area that is free from Thrips palmi.

The consignment complies with Annex 7 to Great Britain's Phytosanitary Regulation (2019/2072), part A item 8A a: the plants originate in the Netherlands established by the national plant protection organisation in accordance with ISPM4 as an area that is free from Popillia japonica

Argyranthemum frutescens (0003)

The consignment complies with Annex 7 to Great Britain's Phytosanitary Regulation (2019/2072), part A item 40e: Immediately prior to their export, the plants have been officially inspected and found free from Liriomyza huidobrensis and Liriomyza trifolii.

The consignment complies with Annex 7 to Great Britain's Phytosanitary Regulation (2019/2072), part A item 6ai: The plants originate in The Netherlands as an area established by the national plant protection organisation in accordance with ISPM4 as an area that is free from Thrips palmi.

The consignment complies with Annex 7 to Great Britain's Phytosanitary Regulation (2019/2072), part A item 8A a: the plants originate in the Netherlands established by the national plant protection organisation in accordance with ISPM4 as an area that is free from Popillia japonica

The consignment complies with Annex 7 to Great Britain's Phytosanitary Regulation (2019/2072), part B item 2b: The plants have been grown during a period of at least three years before export, or in the case of plants which are younger than three years have been grown throughout their life, in the Netherlands established by the national plant protection organization in accordance with ISPM4 as an area that is free from Xylella fastidiosa.

Celosia sp. (0006); Senecio sp. (0028)

The consignment complies with Annex 7 to Great Britain's Phytosanitary Regulation (2019/2072), part A item 40e: Immediately prior to their export, the plants have been officially inspected and found free from Liriomyza huidobrensis and Liriomyza trifolii.

The consignment complies with Annex 7 to Great Britain's Phytosanitary Regulation (2019/2072), part A item 6ai: The plants originate in The Netherlands as an area established by the national plant protection organisation in accordance with ISPM4 as an area that is free from Thrips palmi.

The consignment complies with Annex 7 to Great Britain's Phytosanitary Regulation (2019/2072), part A item 8A a: the plants originate in the Netherlands established by the national plant protection organisation in accordance with ISPM4 as an area that is free from Popillia japonica

Dracaena sp. (0011)

The consignment complies with Annex 7 to Great Britain's Phytosanitary Regulation (2019/2072), part A item 6ai: The plants originate in Belgium as an area established by the national plant protection organisation in accordance with ISPM4 as an area that is free from Thrips palmi.

PHYTOSANITARY CERTIFICATE:

No. EC NL/ PCNU 326528429

Date : 16-APRIL-2025

Page : 2 of 3

The consignment complies with Annex 7 to Great Britain's Phytosanitary Regulation (2019/2072), part A item 8A a: the plants originate in Belgium established by the national plant protection organisation in accordance with ISPM4 as an area that is free from *Popillia japonica*

Lavandula stoechas (0022)

The consignment complies with Annex 7 to Great Britain's Phytosanitary Regulation (2019/2072), part A item 28a: The plants originate in an area established by the national plant protection organisation in accordance with ISPM4 as an area that is free from *Candidatus Phytoplasma 'solani'*.

The consignment complies with Annex 7 to Great Britain's Phytosanitary Regulation (2019/2072), part A item 6ai: The plants originate in The Netherlands as an area established by the national plant protection organisation in accordance with ISPM4 as an area that is free from *Thrips palmi*.

The consignment complies with Annex 7 to Great Britain's Phytosanitary Regulation (2019/2072), part A item 8A a: the plants originate in the Netherlands established by the national plant protection organisation in accordance with ISPM4 as an area that is free from *Popillia japonica*

The consignment complies with Annex 7 to Great Britain's Phytosanitary Regulation (2019/2072), part B item 4a: The plants have been grown: (i) during a period of at least three years before export, or in the case of plants which are younger than three years, have been grown throughout their life, in a country which, in accordance with the measures specified in ISPM4, is known to be free from *Xylella fastidiosa*, and (ii) in a site that is subject to annual official inspection, with sampling and testing carried out at the appropriate times on those plants for the presence of *Xylella fastidiosa* and in accordance with international standards, using a sampling scheme able to identify with 99% reliability a level of presence of infected plants of 5%, in which the absence of *Xylella fastidiosa* was confirmed.

Olea europaea (0023)

The consignment complies with Annex 7 to Great Britain's Phytosanitary Regulation (2019/2072), part A item 6ai: The plants originate in Italy as an area established by the national plant protection organisation in accordance with ISPM4 as an area that is free from *Thrips palmi*.

The consignment complies with Annex 7 to Great Britain's Phytosanitary Regulation (2019/2072), part A item 6aii: The plants originate in a place of production established by the national plant protection organisation in accordance with ISPM10 as an area that is free from *Thrips palmi*, on the basis of official inspections carried out at least monthly during the three months prior to export.

The consignment complies with Annex 7 to Great Britain's Phytosanitary Regulation (2019/2072), part A item 8A a: originate in an area established by the national plant protection organisation of the country of origin in accordance with ISPM4 as an area that is free from *Popillia japonica*

The consignment complies with Annex 7 to Great Britain's Phytosanitary Regulation (2019/2072), part A item 8a + 8bii: No symptoms of the relevant pests (*Begomo* viruses, Cucumber vein yellowing virus, Cucurbit yellow stunting disorder virus, Lettuce infectious yellow virus, Melon yellowing-associated virus, Squash vein yellowing virus, Sweet potato chlorotic stunt virus, Sweet potato mild mottle virus, Tomato mild mottle virus, Tomato leaf curl New Delhi virus) have been observed on the plants during their complete cycle of vegetation, and the site of production has been found free from *Bemisia tabaci* and other vectors of the relevant plant pests on official inspections carried out at appropriate times to detect those pests.

The consignment complies with Annex 7 to Great Britain's Phytosanitary Regulation (2019/2072), part B item 5b: (i) The plants have been grown in a place of production which has been registered and supervised by the national plant protection organisation for a period of at least one year before the export of the plants, and (ii) the place of production, together with a 200m zone surrounding the place of production, is known to be free from *Xylella fastidiosa* on the basis of official inspections, which included testing where appropriate, carried out at appropriate times during the 12 months before the export of the plants, and (iii) the plants have been subjected to an annual official inspection at an appropriate time, which included sampling and testing, that confirmed the absence of *Xylella fastidiosa* and was carried out in accordance with international standards using a sampling scheme able to identify with 99% reliability a level of presence of infected plants of 1%, and (iv) immediately before their export, the plants were subjected to an official visual inspection for the presence of *Xylella fastidiosa* and, where any symptoms giving rise to a suspicion of its presence were observed, were tested in line with international standards for its presence, confirming its absence, and (v) where the place of production of the plants is located in an area where *Xylella fastidiosa* is known to occur, the plants have been grown under complete physical protection for a period of at least four years before their export or, in the case of plants which are younger than four years, throughout their life.

Phalaenopsis sp. (0024)

The consignment complies with Annex 7 to Great Britain's Phytosanitary Regulation (2019/2072), part A item 6ai: The plants originate in The Netherlands as an area established by the national plant protection organisation in accordance with ISPM4 as an area that is free from *Thrips palmi*.

The consignment complies with Annex 7 to Great Britain's Phytosanitary Regulation (2019/2072), part A item 8A a: the plants originate in the Netherlands established by the national plant protection organisation in accordance with ISPM4 as an area that is free from *Popillia japonica*

The specimens are artificially propagated as defined by CITES

Place of issue : BLEISWIJK
