The consignment complies with Annex 7 to Great Britain's Phytosanitary Regulation (2019/2072), part A item 6ai: The plants originate in The Netherlands as an area established by the national plant protection organisation in accordance with ISPM4 as an area that is free from Thrips palmi.

Acer conspicuum (0002); Acer palmatum (0003); Cytisus scoparius (0036); Euryops pectinatus (0056); Fatsia japonica (0060); Hebe hybrid (0069), (0070); Magnolia grandiflora (0103); Rubus hybrid (0134); Strelitzia reginae (0145), (0158)

The consignment complies with Annex 7 to Great Britain's Phytosanitary Regulation (2019/2072), part A item 6ai: The plants originate in The Netherlands as an area established by the national plant protection organisation in accordance with ISPM4 as an area that is free from Thrips palmi.

The consignment complies with Annex 7 to Great Britain's Phytosanitary Regulation (2019/2072), part B item 2b: The plants have been grown during a period of at least three years before export, or in the case of plants which are younger than three years have been grown throughout their life, in the Netherlands established by the national plant protection organization in accordance with ISPM4 as an area that is free from Xylella fastidiosa.

Agapanthus africanus (0005); Euonymus japonicus (0053); Hosta hybrid (0075); Iris sibirica (0085); Paeonia lactiflora (0110); Photinia fraseri (0119); Pieris japonica (0123), (0124)

The consignment complies with Annex 7 to Great Britain's Phytosanitary Regulation (2019/2072), part A item 6ai: The plants originate in Belgium as an area established by the national plant protection organisation in accordance with ISPM4 as an area that is free from Thrips palmi.

Argyranthemum frutescens (0010)

The consignment complies with Annex 7 to Great Britain's Phytosanitary Regulation (2019/2072), part A item 40e: Immediately prior to their export, the plants have been officially inspected and found free from Liriomyza huidobrensis and Liriomyza trifolii.

The consignment complies with Annex 7 to Great Britain's Phytosanitary Regulation (2019/2072), part A item 6ai: The plants originate in Italy as an area established by the national plant protection organisation in accordance with ISPM4 as an area that is free from Thrips palmi.

The consignment complies with Annex 7 to Great Britain's Phytosanitary Regulation (2019/2072), part A item 8a + 8bi: No symptoms of the relevant pests (Begomo viruses, Cucumber vein yellowing virus, Cucurbit yellow stunting disorder virus, Lettuce infectious yellow virus, Melon yellowing-associated virus, Squash vein yellowing virus, Sweet potato chlorotic stunt virus, Sweet potato mild mottle virus,

PHYTOSANITARY CERTIFICATE:

No. EC NL/ PCNU 298939257

Date : 04-APRIL-2024

Page : 4 of 7

Tomato mild mottle virus, Tomato leaf curl New Delhi virus) have been observed on the plants during their complete cycle of vegetation, and the plants originate in areas which, in accordance with the measures specified in ISPM4, are known to be free from Bemisia tabaci and other vectors of the relevant pests.

Argyranthemum frutescens (0011); Astringia major (0015); Campanula hybrid (0022); Campanula persicifolia (0023); Campanula portenschlagiana (0024); Clematis hybrid (0030); Cyclamen hybrid (0034); Echinacea purpurea (0046), (0047); Felicia amelloides (0062); Fuchsia hybrid (0064); Jasminum polyanthum (0086); Leucanthemum maximum (0095); Nepeta faassenii (0108); Passiflora caerulea (0113); Passiflora hybrid (0112); Phlox paniculata (0118); Salvia greggii (0136); Salvia nemorosa (0137); Senecio hybrid (0143); Stachys officinalis (0144)

The consignment complies with Annex 7 to Great Britain's Phytosanitary Regulation (2019/2072), part A item 40e: Immediately prior to their export, the plants have been officially inspected and found free from Liriomyza huidobrensis and Liriomyza trifolii.

The consignment complies with Annex 7 to Great Britain's Phytosanitary Regulation (2019/2072), part A item 6ai: The plants originate in The Netherlands as an area established by the national plant protection organisation in accordance with ISPM4 as an area that is free from Thrips palmi.

Calibrachoa hybrid (0020); Petunia hybrid (0117)

The consignment complies with Annex 7 to Great Britain's Phytosanitary Regulation (2019/2072), part A item 28a: The plants originate in an area established by the national plant protection organisation in accordance with ISPM4 as an area that is free from Candidatus Phytoplasma 'solani'.

The consignment complies with Annex 7 to Great Britain's Phytosanitary Regulation (2019/2072), part A item 40e: Immediately prior to their export, the plants have been officially inspected and found free from Liriomyza huidobrensis and Liriomyza trifolii.

The consignment complies with Annex 7 to Great Britain's Phytosanitary Regulation (2019/2072), part A item 6ai: The plants originate in The Netherlands as an area established by the national plant protection organisation in accordance with ISPM4 as an area that is free from Thrips palmi.

The consignment complies with Annex 7 to Great Britain's Phytosanitary Regulation (2019/2072), part A item 9ai + 9bii: The plants originate in areas which, in accordance with the measures specified in ISPM4, are known to be free from Tomato leaf curl New Delhi Virus, and The plants have been subjected to an effective treatment ensuring the eradication of Bemisia tabaci and other vectors of Tomato leaf curl New Delhi Virus.

Dianthus hybrid (0039)

The consignment complies with Annex 7 to Great Britain's Phytosanitary Regulation (2019/2072), part A item 36a: The plants originate in the area The Netherlands, established by the national plant protection organisation in accordance with ISPM4 as an area that is free from Spodoptera eridania, Spodoptera frugiperda and Spodoptera litura.

The consignment complies with Annex 7 to Great Britain's Phytosanitary Regulation (2019/2072), part A item 38b: No signs of Helicoverpa armigera or Spodoptera littoralis have been observed at the place of production since the beginning of the last complete cycle of vegetation.

The consignment complies with Annex 7 to Great Britain's Phytosanitary Regulation (2019/2072), part A item 40e: Immediately prior to their export, the plants have been officially inspected and found free from Liriomyza huidobrensis and Liriomyza trifolii.

The consignment complies with Annex 7 to Great Britain's Phytosanitary Regulation (2019/2072), part A item 6ai: The plants originate in The Netherlands as an area established by the national plant protection organisation in accordance with ISPM4 as an area that is free from Thrips palmi.

Erysimum hybrid (0048); Helianthus hybrid (0071); Lupinus hybrid (0102)

The consignment complies with Annex 7 to Great Britain's Phytosanitary Regulation (2019/2072), part A item 40e: Immediately prior to their export, the plants have been officially inspected and found free from Liriomyza huidobrensis and Liriomyza trifolii.

The consignment complies with Annex 7 to Great Britain's Phytosanitary Regulation (2019/2072), part A item 6ai: The plants originate in The Netherlands as an area established by the national plant protection organisation in accordance with ISPM4 as an area that is free from Thrips palmi.

The consignment complies with Annex 7 to Great Britain's Phytosanitary Regulation (2019/2072), part B item 2b: The plants have been grown during a period of at least three years before export, or in the case of plants which are younger than three years have been grown throughout their life, in the Netherlands established by the national plant protection organization in accordance with ISPM4 as an area that is free from Xylella fastidiosa.

Hemerocallis hybrid (0072)

The consignment complies with Annex 7 to Great Britain's Phytosanitary Regulation (2019/2072), part A item 6ai: The plants originate in Belgium as an area established by the national plant protection organisation in accordance with ISPM4 as an area that is free from Thrips palmi.

The consignment complies with Annex 7 to Great Britain's Phytosanitary Regulation (2019/2072), part B item 2b: The plants have been grown during a period of at least three years before export, or in the case of plants which are younger than three years have been grown throughout their life, in an area which has been established by the national plant protection organisation in accordance with ISPM4 as an area that is free from Xylella fastidiosa.

Hibiscus syriacus (0074)

The consignment complies with Annex 7 to Great Britain's Phytosanitary Regulation (2019/2072), part A item 12d: The plants have been officially inspected and found free from Bemisia tabaci immediately prior to their movement.

The consignment complies with Annex 7 to Great Britain's Phytosanitary Regulation (2019/2072), part A

Page : 5 of 7

item 40e: Immediately prior to their export, the plants have been officially inspected and found free from *Liriomyza huidobrensis* and *Liriomyza trifolii*.

The consignment complies with Annex 7 to Great Britain's Phytosanitary Regulation (2019/2072), part A item 6ai: The plants originate in The Netherlands as an area established by the national plant protection organisation in accordance with ISPM4 as an area that is free from *Thrips palmi*.

The consignment complies with Annex 7 to Great Britain's Phytosanitary Regulation (2019/2072), part B item 2b: The plants have been grown during a period of at least three years before export, or in the case of plants which are younger than three years have been grown throughout their life, in the Netherlands established by the national plant protection organization in accordance with ISPM4 as an area that is free from *Xylella fastidiosa*.

Lavandula angustifolia (0089); Lavandula stoechas (0092)

The consignment complies with Annex 7 to Great Britain's Phytosanitary Regulation (2019/2072), part A item 28a: The plants originate in an area established by the national plant protection organisation in accordance with ISPM4 as an area that is free from *Candidatus Phytoplasma 'solani'*.

The consignment complies with Annex 7 to Great Britain's Phytosanitary Regulation (2019/2072), part A item 6ai: The plants originate in Italy as an area established by the national plant protection organisation in accordance with ISPM4 as an area that is free from *Thrips palmi*.

The consignment complies with Annex 7 to Great Britain's Phytosanitary Regulation (2019/2072), part A item 8a + 8bi: No symptoms of the relevant pests (*Begomo* viruses, Cucumber vein yellowing virus, Cucurbit yellow stunting disorder virus, Lettuce infectious yellow virus, Melon yellowing-associated virus, Squash vein yellowing virus, Sweet potato chlorotic stunt virus, Sweet potato mild mottle virus, Tomato mild mottle virus, Tomato leaf curl New Delhi virus) have been observed on the plants during their complete cycle of vegetation, and the plants originate in areas which, in accordance with the measures specified in ISPM4, are known to be free from *Bemisia tabaci* and other vectors of the relevant pests.

The consignment complies with Annex 7 to Great Britain's Phytosanitary Regulation (2019/2072), part B item 4b: (i) The plants have been grown in a place of production which has been registered and supervised by the national plant protection organisation for a period of at least one year before the export of the plants, and (ii) the place of production, together with a 200m zone surrounding the place of production, is known to be free from *Xylella fastidiosa* on the basis of official inspections, which included testing where appropriate, that was carried out at appropriate times; and (iii) the plants have been subjected to an annual official inspection at an appropriate time, which included sampling and testing, that confirmed the absence of *Xylella fastidiosa* and was carried out in accordance with international standards using a sampling scheme able to identify with 99% reliability a level of presence of infected plants of 5%, and (iv) immediately before their export, the plants were subjected to an official visual inspection for the presence of *Xylella fastidiosa* and, where any symptoms giving rise to a suspicion of its presence were observed, were tested in line with international standards for its presence, confirming its absence, and (v) where there has been any evidence of the presence of the vector of *Xylella fastidiosa* at the place of production, chemical and cultural controls have been used to suppress the vector, and (vi) the plants have been grown throughout their life under complete physical protection, and appropriate hygiene measures have been implemented at the place of production to ensure that *Xylella fastidiosa* is not transmitted by tools or equipment.

Lavandula angustifolia (0090), (0091); Lavandula stoechas (0093), (0094)

The consignment complies with Annex 7 to Great Britain's Phytosanitary Regulation (2019/2072), part A item 28a: The plants originate in an area established by the national plant protection organisation in accordance with ISPM4 as an area that is free from *Candidatus Phytoplasma 'solani'*.

The consignment complies with Annex 7 to Great Britain's Phytosanitary Regulation (2019/2072), part A item 6ai: The plants originate in The Netherlands as an area established by the national plant protection organisation in accordance with ISPM4 as an area that is free from *Thrips palmi*.

The consignment complies with Annex 7 to Great Britain's Phytosanitary Regulation (2019/2072), part B item 4a: The plants have been grown: (i) during a period of at least three years before export, or in the case of plants which are younger than three years, have been grown throughout their life, in a country which, in accordance with the measures specified in ISPM4, is known to be free from *Xylella fastidiosa*, and (ii) in a site that is subject to annual official inspection, with sampling and testing carried out at the appropriate times on those plants for the presence of *Xylella fastidiosa* and in accordance with international standards, using a sampling scheme able to identify with 99% reliability a level of presence of infected plants of 5%, in which the absence of *Xylella fastidiosa* was confirmed.

Mesembryanthemum sp. (0105)

The consignment complies with Annex 7 to Great Britain's Phytosanitary Regulation (2019/2072), part A item 6ai: The plants originate in Italy as an area established by the national plant protection organisation in accordance with ISPM4 as an area that is free from *Thrips palmi*.

The consignment complies with Annex 7 to Great Britain's Phytosanitary Regulation (2019/2072), part A item 8a + 8bi: No symptoms of the relevant pests (*Begomo* viruses, Cucumber vein yellowing virus, Cucurbit yellow stunting disorder virus, Lettuce infectious yellow virus, Melon yellowing-associated virus, Squash vein yellowing virus, Sweet potato chlorotic stunt virus, Sweet potato mild mottle virus, Tomato mild mottle virus, Tomato leaf curl New Delhi virus) have been observed on the plants during their complete cycle of vegetation, and the plants originate in areas which, in accordance with the measures specified in ISPM4, are known to be free from *Bemisia tabaci* and other vectors of the relevant pests.

Pelargonium grandiflorum (0115); Pelargonium hybrid (0114); Pelargonium zonale (0116)

The consignment complies with Annex 7 to Great Britain's Phytosanitary Regulation (2019/2072), part A

PHYTOSANITARY CERTIFICATE:

item 36a: The plants originate in the area The Netherlands, established by the national plant protection organisation in accordance with ISPM4 as an area that is free from *Spodoptera eridania*, *Spodoptera frugiperda* and *Spodoptera litura*.

The consignment complies with Annex 7 to Great Britain's Phytosanitary Regulation (2019/2072), part A item 38b: No signs of *Helicoverpa armigera* or *Spodoptera littoralis* have been observed at the place of production since the beginning of the last complete cycle of vegetation.

The consignment complies with Annex 7 to Great Britain's Phytosanitary Regulation (2019/2072), part A item 40e: Immediately prior to their export, the plants have been officially inspected and found free from *Liriomyza huidobrensis* and *Liriomyza trifolii*.

The consignment complies with Annex 7 to Great Britain's Phytosanitary Regulation (2019/2072), part A item 6ai: The plants originate in The Netherlands as an area established by the national plant protection organisation in accordance with ISPM4 as an area that is free from *Thrips palmi*.

The consignment complies with Annex 7 to Great Britain's Phytosanitary Regulation (2019/2072), part B item 2b: The plants have been grown during a period of at least three years before export, or in the case of plants which are younger than three years have been grown throughout their life, in the Netherlands established by the national plant protection organization in accordance with ISPM4 as an area that is free from *Xylella fastidiosa*.

Rhododendron japonicum (0131)

The consignment complies with Annex 7 to Great Britain's Phytosanitary Regulation (2019/2072), part A item 6ai: The plants originate in Belgium as an area established by the national plant protection organisation in accordance with ISPM4 as an area that is free from *Thrips palmi*.

The consignment complies with Annex 7 to Great Britain's Phytosanitary Regulation (2019/2072), part B item 1c: Where signs of *Phytophthora ramorum*, have been found on the plants at the place of production, an official statement that appropriate procedures have been implemented for the purpose of eradicating that pest and the plants have been found free from the pest following those procedures, which consisted of at least: (i) destruction of the infected plants and all susceptible plants within a 2 m radius of the infected plants, including associated growing media and plant debris, (ii) in the case of plants (*Viburnum* spp., *Camellia* spp. of *Rhododendron* spp., other than *Rhododendron simsii*) of this entry within a 10 m radius of the infected plants and any remaining plants from the infected lot: (aa)they have been retained at the place of production, (bb)additional official inspections have been carried out at least twice in the three months after the eradication measures have been taken when the plants are in active growth, (cc)no treatments that may suppress symptoms of the plant pest have been carried out in that three month period, and (dd)the plants have been found free from the pest on these official inspections, (iii) in the case of all other plants (*Viburnum* spp., *Camellia* spp. of *Rhododendron* spp., m.u.v. *Rhododendron simsii*) of this entry at the place of production, the plants have been subjected to intensive official re-inspection and have been found free from the pest on those inspections, and (iv) appropriate phytosanitary measures have been taken on the growing surface within a 2 m radius of infected plants.

Salvia rosmarinus (0133)

The consignment complies with Annex 7 to Great Britain's Phytosanitary Regulation (2019/2072), part A item 40e: Immediately prior to their export, the plants have been officially inspected and found free from *Liriomyza huidobrensis* and *Liriomyza trifolii*.

The consignment complies with Annex 7 to Great Britain's Phytosanitary Regulation (2019/2072), part A item 6ai: The plants originate in Italy as an area established by the national plant protection organisation in accordance with ISPM4 as an area that is free from *Thrips palmi*.

The consignment complies with Annex 7 to Great Britain's Phytosanitary Regulation (2019/2072), part A item 8a + 8bi: No symptoms of the relevant pests (*Begomo* viruses, *Cucumber vein yellowing virus*, *Cucurbit yellow stunting disorder virus*, *Lettuce infectious yellow virus*, *Melon yellowing-associated virus*, *Squash vein yellowing virus*, *Sweet potato chlorotic stunt virus*, *Sweet potato mild mottle virus*, *Tomato mild mottle virus*, *Tomato leaf curl New Delhi virus*) have been observed on the plants during their complete cycle of vegetation, and the plants originate in areas which, in accordance with the measures specified in ISPM4, are known to be free from *Bemisia tabaci* and other vectors of the relevant pests.

The consignment complies with Annex 7 to Great Britain's Phytosanitary Regulation (2019/2072), part B item 4b: (i) The plants have been grown in a place of production which has been registered and supervised by the national plant protection organisation for a period of at least one year before the export of the plants, and (ii) the place of production, together with a 200m zone surrounding the place of production, is known to be free from *Xylella fastidiosa* on the basis of official inspections, which included testing where appropriate, that was carried out at appropriate times; and (iii) the plants have been subjected to an annual official inspection at an appropriate time, which included sampling and testing, that confirmed the absence of *Xylella fastidiosa* and was carried out in accordance with international standards using a sampling scheme able to identify with 99% reliability a level of presence of infected plants of 5%, and (iv) immediately before their export, the plants were subjected to an official visual inspection for the presence of *Xylella fastidiosa* and, where any symptoms giving rise to a suspicion of its presence were observed, were tested in line with international standards for its presence, confirming its absence, and (v) where there has been any evidence of the presence of the vector of *Xylella fastidiosa* at the place of production, chemical and cultural controls have been used to suppress the vector, and (vi) the plants have been grown throughout their life under complete physical protection, and appropriate hygiene measures have been implemented at the place of production to ensure that *Xylella fastidiosa* is not transmitted by tools or equipment.

Viburnum davidii (0152); Viburnum plicatum (0153); Viburnum tinus (0154)

The consignment complies with Annex 7 to Great Britain's Phytosanitary Regulation (2019/2072), part A
